Dear Hiring Manager,

I am writing to express my interest in the Wireless Engineering Internship at Google. With a solid foundation in the field of computer science, coupled with an avid interest in software development, I strongly feel I can give something back to your team while getting some good experience.

Currently studying a Bachelor's in Computer Science and AI at IE University. I am on track to graduate in July 2026, making me eligible to fulfil the requirements for the internship duration between May - October 2025. Throughout my studies, I have been equipped with a comprehensive understanding of programming languages including Python, C, C++, and JavaScript as well as HTML and CSS, and I have applied this knowledge in various projects and practical experiences.

I honed my skills in data engineering and automation during my recent internship with Resilience Care, working extensively with SQL, YML/YAML, Python, Bash, and Github. I also co-founded and managed startups for which I developed web applications, using technology as a driver for business. My most recent venture is IE Tutoring.

This role at Google offers an excellent opportunity to work in a sector different from my studies but as interesting and intriguing. I am excited about contributing to the company.

I am further impressed by Google's obligation to attack the biggest challenges and leave a mark globally. I therefore look forward to bringing my technical skills, entrepreneurial mindset, and passion for innovation to your team.

Thank you for considering my application. I'm really excited about the prospect of joining Google, and the possibility to input my skills and experience into such a great company. I am available to interview at your earliest convenience.

Warm regards,

Baptiste Etroy
